Project Design
Phase-I Solution
Architecture

Date	15 October 2022
Team ID	PNT2022TMID17335
Project Name	Project -PERSONAL ASSISTANCE FOR SENIORS WHO ARE SELF-RELIANT
Maximum Marks	4 Marks

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- ❖ Medicine Remainders serve as good way to stay on track and uphold appropriate schedule.

- ❖ It helps in decreasing medication dispensing errors and wrong dosages.

It is used to organize your medication doses for a certain length of time.
